## PROFESSIONAL WORK EXPERIENCE

Jan. 2015 – Mar. 2015	<b>IF Isobar Malaysia – Web Developer</b> <i>Created and maintained web sites for various client events.</i>  + Created interactive websites for clients like Oreo Malaysia and Air Asia with the help of a graphic designer. + Assisted the team on big projects for clients like CIMB and Honda.
Jan. 2014 – Mar. 2014	<b>Mattel (M) Sdn. Bhd. - IT Dept.</b> <i>Acted as a liaison between Eng. And IT Dept. in projects to create web pages to be used by the engineers.</i>  + Created web pages to visualize data from the server. HTML, CSS, JS for front-end. ASP Classic for back-end. + Improved the previous product database by adding more fields and giving it a responsive design. + Improved page loading speed by implementing caching and ajax.
Jan. 2013 – Mar. 2013	<b>Mattel (M) Sdn. Bhd. - Engineering Dept.</b> <i>Assisted the engineers in their daily task.</i>  + Filing documentation with MS-Excel and MS-Word. + Created Excel Macros to ease data input. + Assisted in reviewing engineering samples. + Collected logs from production line.

## PROJECTS

### AngelHack KL Hackaton

view project review @ <http://www.hackathon.io/isee>

Developed a system to receive image feeds of vehicles from multiple CCTV cameras scattered around a city and then compare the number plates with available number plates (stolen vehicles, vehicles suspected to be used in criminal activities) that are in the database.

+ Used MATLAB to analyze sets of images of a plate number and apply image correction. Then user character recognition to output plate number as a string.

---

### IF Isobar Malaysia

view my work for AirAsiaBig @ <http://www.airasiabig.com/thebigeducation/my.php>

Developed responsive interactive websites for Isobar clients.

+ Used the Gumby framework in addition with various JS libraries.  
+ Integrated website with Google Analytics and Search Engine Optimization.  
+ Integrate website with social media services using Facebook and Twitter API's.

---

### Animagaki 2014

view my work @ <https://web.archive.org/web/20141215040832/http://animangaki.com/>

Developed responsive event website for the yearly Animangaki event for the year 2014.

+ HTML, CSS, JS, PHP used.  
+ Regularly maintained the page and created new pages until event end date.

---
